FEEDBACK FROM OUR CLIENTS

Before partnering with CompassMSP our server storage was maxed out and required frequent rebooting. Compass facilitated a seamless migration to the cloud and resolved our issues. Their team is extremely responsive and great to work with. - Healthcare Supply Solutions

CompassMSP is accessible and attentive when we have a problem. They resolve an issue and automatically begin implementing a solution so it doesn't happen again. - MDM Commercial

Polestar Pilates International has been a CompassMSP customer for over 13 years. They've always provided exceptional customer service and IT solutions for our growing business. We trust in their ability to manage our business IT needs and would highly recommend them. - Polestar Pilates International

Uptime Counts:

99.998%

average CompassCloud uptime.

Your Time Counts:

4 minutes 20 seconds

average helpdesk call length.

Experience Counts:

12 years

average years of industry experience on our team.

MANAGED IT SERVICES

CompassComplete:

Full-scale IT as a Service (ITaaS) comparable to an in-house IT department for clients who don't have sufficient resources to operate a full-IT staff. This encompasses everything from procurement to 24/7 monitoring and management.

CompassComplementary:

Customized managed IT services designed to supplement your existing IT practices and staff to provide a more comprehensive IT strategy. Services are tailored to meet your individual needs and fill any gaps your team lacks the time or expertise to focus on.

MANAGED VOIP SERVICES

Managed VoIP services utilize cloud-based hosting, eliminating traditional PBX hardware and enabling the phone system to continue to grow with your company. Additional lines, features and software updates can be made with the click of a button.

MANAGED CLOUD SOLUTIONS

From concept to migration and beyond, we're your cloud resource. Our expansive range of cloud solutions enable you to implement the technology you need on terms that suit your preference, budgeting and business model.

TECHNOLOGY OPTIMIZATION

Unique services designed to optimize the way you use technology, and help you streamline your telecom and IT. We can identify any issues you may be facing, and develop custom solutions specific to your business.

CYBER SECURITY

With constant attacks from many sources and the growing use of mobile devices, social networks, and cloud-based applications, keeping your network secure is essential. Protect your staff, clients and your data and free up time to focus on operations without worrying about security while we continuously monitor your network for threats, and eliminate issues before they arise.
